US EPA RECORDS CENTER REGION 5

Dear Jon:

On behalf of the Michigan Department of Transportation, it is our understanding that the remedial cleanup criteria for the Former Bulk Oil Storage Facility in Clare, Michigan has been changed under Public Act #451, as amended in 1995 to reflect the new 201 criteria of 5 ug/L for TCE.

It is my understanding that an amendment to the ROD for the PRP members is also in the process of being changed to reflect this TCE cleanup criteria value of 5 ug/L.

Please respond if we should be operating under a different value than that mentioned above.

Thanks for your assistance in this environmental cleanup.

Sincerely,

GLOBAL REMEDIATION TECHNOLOGIES, INC.

Richard M. Raetz, P.E.
